

# Celebrating KLA-MO-YA (Klamath) Tribally Owned Casino Smoke-Free Reopening

## **KLA-MO-YA implements smoke-free policy to protect the health of their tribal community and patrons**

Secondhand smoke can lead to:

- Heart disease
- Lung Cancer
- Respiratory Diseases
- Adverse Effects on the Health of Infants and Children

100% Smoke-free work place policies are the only effective way to eliminate secondhand smoke exposure in the work place

The Surgeon General Concludes that there is no risk-free level of secondhand smoke

"Smoking, vaping, and exposure to secondhand smoke and aerosols can increase risks associated with COVID-19 transmission. Removing face coverings to smoke or vape indoors undermines the proven benefit of face coverings and increases the risk of transmitting or inhaling COVID-19 via infectious respiratory droplets, uncovered coughs, and increased touching of faces".

## **Providing a smoke-free environment sends a positive message**

Creating a safe and healthy workplace can:

- Decrease turnover
- Reduce healthcare costs
- Promote the health of guests and employees as a top priority
- Display a commitment to promote social -tribal responsibility
